

Before you decide on which playground to purchase check the following:

- Plastic coated, textured, non-slip surface, all weather decks
- Decks without sharp edges to ensure minimum injury
- Double rust-resistant fasteners to all structural points
- Anti-tamper fasteners used throughout structure
- Easy grip posts ideal for small hands  
(no larger than 75x75mm)
- High strength posts sufficient to support load  
(one 75x75 steel post supports 13 tone.)
- A 100mm post with a wall thickness of 1.5mm,  
will actually contain **23.5% Less** steel than our  
75mm posts with a wall thickness of 2.5mm.
- Fully galvanized steel components  
(internal and external corrosion resistance)
- Full colour range of powder coat finishes  
(up to 50 colours)
- Correctly prepared welds, mechanically cleaned
- Welds treated with zinc rich primer for corrosion resistance
- Member of The Playground & Recreation Association of  
Victoria.
- All equipment consistent with the current  
Australian Standards for play equipment
